

Bazzani Associates

Peter Skornia, LEED AP President

Peter has worked in the design and construction industry for owners, designers, contractors and developers on projects in over 25 states. These projects include new construction and renovation in office, residential, educational and medical markets ranging in cost from less than 100 thousand to over 100 million.

The primary target of Bazzani Building Company is designing and building high performance buildings. With our in house team and extended network of trusted partners, we expand the role of builder to assist in many areas beyond construction that support a project's goals. These include redevelopment incentives, tax credits, owner's representative services, estimating and scheduling as well as urban re-development assessment with a proven record in the Wealthy Street district, general Grand Rapids market and other communities throughout Michigan and around the country.

Peter joins Bazzani after 8 years as a private consultant providing front end project planning, scope development and budget management. He has a particular focus on developing the client's business case for their real estate needs to match business drivers with construction project scope, cost and schedule.
